iMovie Part 1 “Trailer”: Setup

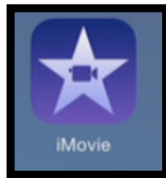

Objective:

In this tutorial, we learn how to do a basic setup for creating a trailer in iMovie. This is a 3 part tutorial that will help you understand the basics of creating a Trailer.

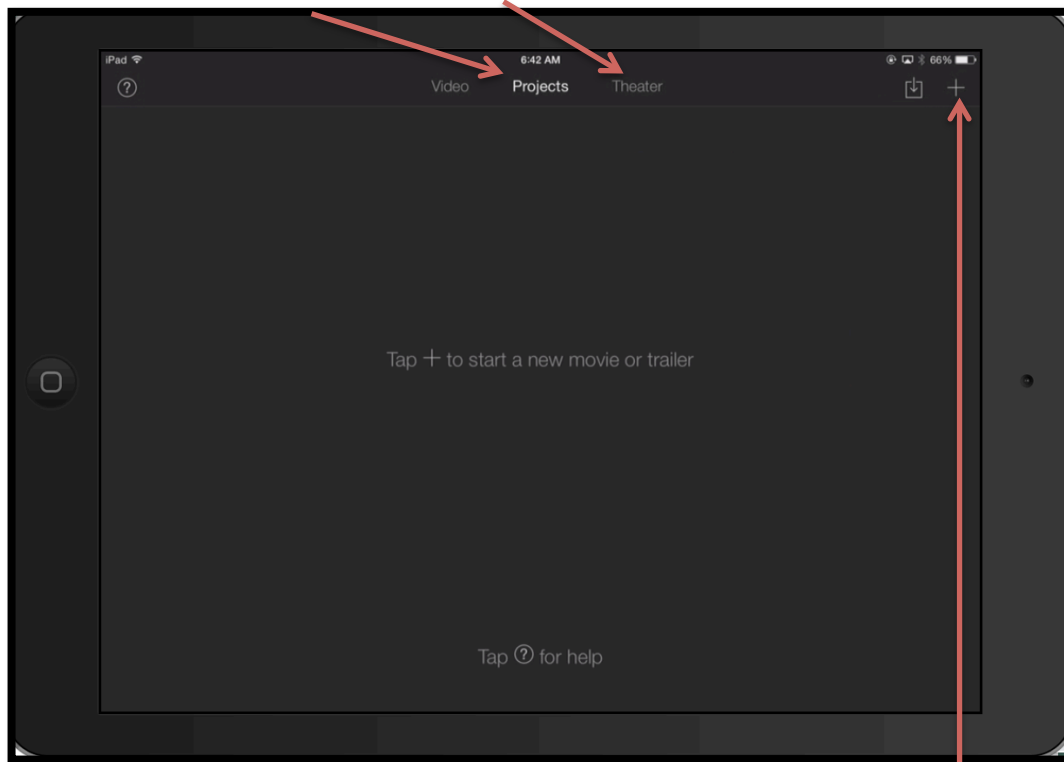

If you don't have, download it from the iTunes store. Here is a link that will help you: <https://itunes.apple.com/us/app/imovie/id377298193?mt=8>

Directions:

1. Click the iMovie App on your iPad

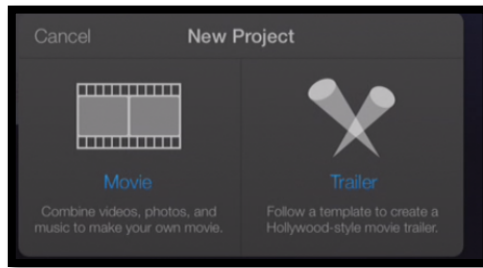

2. Select either **Projects** or **Theater** from the menu at the top.

3. From either Page, Projects or Theater select the **Create Button +**.

4. **New Project** popup window will appear, asking you to select **Movie** or **Trailer** as seen on the next page. For this tutorial, select **Trailer**.

5. On the Template Page, **Select the Template** that you would like to use they are located at the bottom of the screen. You can preview the template by pressing **Play** and you can also the **Time** is provided telling you the length of the clip. Once you have selected the template, press **Create**.

That completes how to start the Trailer Project. In the next part we will look at customizing the project by adding titles, videos, and photos. Then we will wrap it up by sharing our trailer.
