

Edivation Training

School Improvement Network is excited to provide upcoming KVEC Edivation, the New PD 360, Implementation Network Group training. Both building and district-level participant teams should attend these newly designed trainings as they are intended to meet the specific needs of Kentucky educators. Participating teams will contribute ideas, share implementation best practices, and collaborate with one another to make the trainings a success!

What: Implementation Network Group Meetings

Sessions will begin with an overview of School Improvement Network's new platform, Edivation. Next, plenty of time will be provided for sharing best practices amongst participants in order to learn from others' use of Edivation. The remainder of our time will be spent discussing and walking through the Edivation Implementation Framework in order to formulate future plans and walk away with a vision of how Edivation will be used to achieve school, district, and state initiatives.

Who: Teams from each district

Teams should include teacher leaders, building-level administrators, and district-level administrators.

Where: KVEC

**410 Roy Campbell Drive
Hazard**

When:

November 17

Lunch and Refreshments:

An hour lunch break will be allotted for participants to eat lunch on their own. Afternoon refreshments will be provided by School Improvement Network.

Registration:

E-mail Abbie with a list of district participants. I will need names for communication with the school improvement network.
